dbo@ema

A system for archiving, handling and mapping of heterogeneous dialect data for dialect dictionaries

Abstract

This presentation deals with the project dbo@ema, which started on the 1st February 2007 and is financed by the FWF.

Emphases of the presentation are:

a)

information about the general project aims of dbo@ema

- development of a web based, interactive data base

- development of a web based, interactive tool to map dialect data and background

information of a dialect dictionary

- development of a specific, free font for the phonetic transcription of dialect data in digital surroundings

(further information see <http://www.wboe.at>)

b)

how special tools of the developed software that help compiling a dialect dictionary and where there are challenges in creating such a software

c)

how geoinformation aids the compilation of a dialect dictionary

and where there are risks and further innovation potentials

d) the project 'Wörterbuch der bairischen Mundarten in Österreich (WBÖ)' [Dictionary of Bavarian dialects of Austria] and

e) the project 'Datenbank der bairischen Mundarten in Österreich (DBÖ)' [Data base of Bavarian dialects of Austria] that are both mother-projects to the project dbo@ema.

Further information see the related abstract for poster-session (dbo@ema. Die Datenbank der bairischen Mundarten auf dem Weg ins Internet).
